

OUTDOOR VISITATION GUIDELINES FORM

I understand that my visitation privileges are contingent upon following the requirements below, which reflect the measures the facility has deemed necessary to protect the health and safety of facility residents and staff:

1. There will be no more than two (2) visitors per resident visit. No children under the age of 13 or pets are admitted at this time.
2. All visitors must have their temperature taken and complete the COVID-19 screening form prior to the visit. Visitors who have a temperature > 99.9 or who have positive answers to the screening form will not be permitted to visit.
3. All visits are monitored by staff, and the monitor is responsible to provide reminders and feedback to the visitor as necessary to maintain resident safety. The monitor may end any visit if they determine that resident or visitor behavior is compromising health and safety.
4. All visitors must sanitize their hands upon arrival to the booth.
5. All visitors must provide their own face covering and remain masked for the duration of the visit.
6. All visits will take place with the visitor and resident separated by a barrier.
7. There is to be no physical contact between the visitor and the resident.
8. There can be no eating or drinking during the visit.
9. Visitors are to observe the time limitations for the visit appointment. This permits other residents and family to share the visitation experience.
10. Families may bring laundry or other items for their resident, but these cannot be given directly to the resident, but received by staff.

I understand and agree to abide by the guidelines above.
